## PROFESSIONAL SUMMARY

A highly motivated MCA Post graduate with a strong passion for learning new technologies and a solid foundation in UI/UX design. Proficient in Figma software and experienced in Augmented Reality (AR) and Virtual Reality (VR). Seeking a position in Graphics Designer, specifically focusing on Python, to contribute to the creation of innovative, user-friendly applications.

## EDUCATION

C.M.C.S. College, Nashik, (MH)	B.Sc. Computer Science, CGPA 7.88/10.0	JUL'19 – June '22
K. K. Wagh Institute of Eng. Edu. & Research, Nashik (MH)	MCA Computer Application, CGPA 8.09/10.0	NOV'22 - June'24

## TECHNICAL SKILLSET

**Languages** – Python, Java, PHP, AI, ML

**Servers** –XAMM, Amazon EC2

**Platform** – Mac OS, Windows, Linux

**Web Technologies** – HTML, CSS, Bootstrap

**Database** – MySQL, PHP-myAdmin

**Skills** – Social Media Design, Thumbnail, Basic Editing

**Tools** – Figma, FigJam, Canva, Adobe, Photoshop

## PROFESSIONAL EXPERIENCE

<b>TMD Creators – Kalyan, MH</b>	<b>UI/UX Intern</b>	<b>June'03- Nov'29</b>
Designed user-centric interfaces and prototypes in Figma, focusing on responsiveness and visual appeal, while conducting usability testing and gathering feedback to enhance user experience. Created low-fidelity and high-fidelity wireframes to provide clear visual and functional guidelines for development teams.		
<b>Paarsh InfoTech – Nashik, MH</b>	<b>Full Stack Developer Intern</b>	<b>Jan'24- June'24</b>
As a Full Stack Developer specializing in horticulture, I utilize PHP, HTML, CSS, JavaScript, Python, and machine learning. My current project involves developing a dynamic website for the horticulture sector, providing comprehensive services and resources. Through intuitive design and innovative backend solutions, I connect enthusiasts, professionals, and stakeholders, fostering growth and knowledge exchange.		

## PROJECTS

- Food Delivery App**  
Designed a user-friendly dashboard for a food delivery app using Figma, incorporating Figma tools and icons to enhance the UI/UX. Project duration: 2 month.  
(Figma,- JAN' 23 - MARCH'23)
- Streamline Events System** – The Streamline Events System is a web-based platform for effortless event management. Users can register, book events like weddings and parties, and specify details such as date, time, location, and equipment. The system securely stores data, issues unique booking receipts, and allows administrators to collaborate with clients for smooth planning.  
(Reactjs,Nodejs – JAN'22 to JUNE'24)
- Hotel Management** - Created a Hotel Management System using HTML, CSS, PHP, and SQL to improve operational efficiency and user experience. The project included designing a responsive and intuitive front-end interface with HTML and CSS, while PHP handled the server-side functionality and dynamic interactions. SQL for the database, enabling efficient storage and retrieval of data such as bookings, customer info,etc.  
(PHP, DEC 2021 - MAR 2022)

## CERTIFICATIONS

- Coursera Certification** - get started with Figma (UI/UX) (May 27-2023)
- Great Learning** – Data Visualization using Tableau, Google Analytics, Java Programming
- AWS certification** - Ultimate AWS Certified Solution Architect Associate (Currently on Going)
